		Post screw	AR-coating C4 steel	Oval	TX	8.0 x 50	10.0 x 50

ROTADRILL®
THE RED TIP

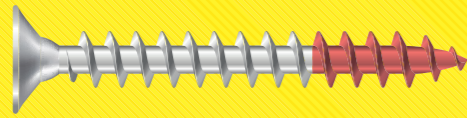

ROTADRILL®
THE RED TIP

FAMOUS RED TIP SCREW

Rotadrill® is for over 40 years an established brand in the world of fastening technology. Rotadrill Industries b.v. is the founder of the patented Rotadrill® Uniscrew with the red tip. This red tip is a special red coloured lubricant which leads to a remarkable low screw in resistance. This makes screwing very easy. And with its red tip our Rotadrill® screw is the most recognisable screw in the world – and it's patented.

The Rotadrill® screw is the biggest premium brand in the DIY wood screw segment in Holland and Belgium. The assortment in screws, the range in dimensions and the unique plastic box and blister packaging concept is tailor-made for the DIY-market.

- + Special red lubricant at the tip
- + Remarkably easy in use
- + Great recognisability
- + Wide assortment
- + Smart presentation
- + Unique plastic packaging

SMART QUALITY PACKAGINGS

All Rotadrill® products are packed in high quality transparent boxes and blisters. These boxes are waterproof, stackable, reclosable and includes a special bit-holder with the right bit.

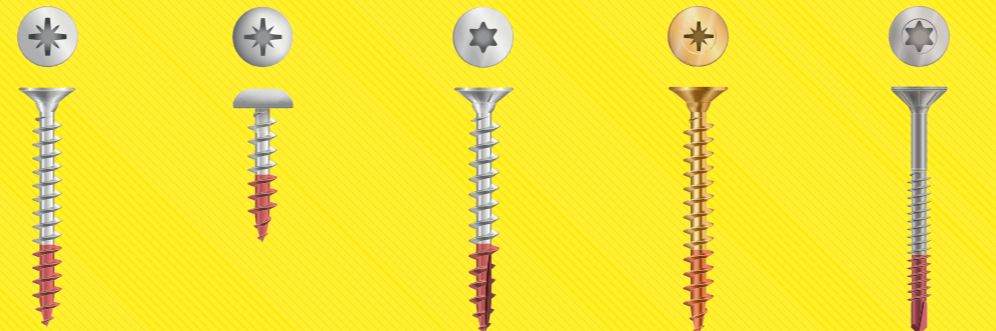

The total packaging concept is a real space saving concept in the shelves of the shop. This means more items per section and a higher turn-over for the reseller.

THE RIGHT SCREW FOR THE JOB

For every job we have a suitable screw in our wide range of quality screws. Our famous uniscrews with the red tip is suitable for many different of applications and buiding materials. Next to this screw we have developed several new types of screws for specific jobs and applications. These screws are named to its application or to its use; this makes it more easy for the customer to find the right screw for his job.

Unique about our smart shop concept is the separation on the application of the screws in different colours on the labels. This provides a clear segmentation in the shelves and leads the customer quick and easy to the right product.

FLAT - ZINC PLATED - PZ

Uniscrews zinc plated with countersunk head and pozi-drive have a blue band on the label and are the most used screws in DIY.

PAN - ZINC PLATED - PZ

Uniscrews zinc plated panhead have a red band on the label. Panhead screws are suitable to make metal-to-metal connections with a screw.

ZINC PLATED - TX

All zinc plated screws with TX-drive have a green band on the label. These are the uniscrews but it includes some specials like MDF- or construction screws. TX-drive gives you more grip and makes screwing in very easy.

BRASS

Brass uniscrews have a orange band on the label. These screws are made for brass fittings.

STAINLESS

Stainless steel screws have a grey band on the label. We have stainless A2 universal screws but also some special stainless-410 screws like decking, hardwood and glazing bead screws.

EASY SCREWING WITH THE RED TIP
